PROFILE

B.Tech AI & DS student specializing in Machine Learning and LLM-based systems, with experience building real-world tools using Python, TensorFlow, LangChain, and Ollama. Developed practical solutions for product classification, HSN code validation, and data-driven decision support. Motivated to grow as an ML Engineer and apply AI techniques to real business challenges.

EDUCATION

Higher Secondary (12th Grade) – Computer Science

Veveaham Matric Hr Sec School - 2023
Score : 526/600

Bachelor of Technology (B.Tech) student in Artificial Intelligence and Data Science

Sri Krishna College of Engineering and Technology | 2023 - 2027
CGPA : 7.57/10

TECHNICAL SKILLS

- **Programming Languages:** C, C++, Python, Java, JavaScript
 - **Web Development:** React.js, Node.js, HTML5, CSS
 - **Database & APIs:** MySQL, RESTful APIs
 - **AI & ML:** PyTorch, TensorFlow, Machine Learning Algorithms
 - **Operating Systems:** Linux (System Administration, Shell Scripting, Package Management) with one year of experience in Ubuntu and Arch Linux.
 - **LLM Agent Development:** Hugging Face, Unsloth, Model API Handling, Ollama, Gradio, LangChain, LangGraph, Google ADK
 - **Cloud Computing Basic:** Azure, AWS, Arch Linux, Ubuntu, Google Cloud
 - **Game Development Basic:** C++, Unreal Engine, Unity, SFML
-

PROJECTS:

ArchVault – System Log Analyzer (Linux Monitoring Tool)

Developed a log analysis and system monitoring application for Arch Linux with both CLI and GUI interfaces.

- Monitors real-time system performance (CPU, memory, disk, GPU)
- Performs log filtering, error detection, and security auditing
- Provides both fast CLI interaction and intuitive GTK-based GUI

Tech stack: C/C++, GTK3, Bash, Arch Linux environment, system logging APIs

HSN Code Validation & Suggestion Agent

Built an LLM-powered agent for validating HSN codes and generating intelligent recommendations based on product descriptions.

- Validates HSN codes with format and hierarchical rules.
- Suggests relevant HSN codes using AI semantic matching.
- Processes large Excel datasets efficiently with pandas.
- Implements structured responses and robust logging for accuracy.

Tech stack: Python, Google ADK, LiteLLM, LLaMA (Ollama), pandas, logging

Full-Stack Web Application – Book Management System

Developed a full-stack system with a React frontend and Spring Boot backend supporting user authentication, book management, and review features.

- Implemented login, registration, JWT auth, and role-based access.
- Built RESTful APIs and database-backed entities for users, books, and reviews.
- Developed admin panel and responsive UI with React.
- Integrated frontend with backend for seamless real-time interaction.

Tech stack: React.js, JavaScript, Spring Boot, Spring Security, JWT, REST APIs, MySQL, Maven

CERTIFICATIONS

Programming: C, C++, Python - (Cadd Cae) , Java - (Infosys Springboard)

AI/ML: Machine Learning, LLM Agent - (Udemy)

Web Development: React js & React Web Developer Certification - (Infosys Springboard)

Cloud & DevOps: Linux (Administration) - (Udemy) , Azure fundamentals - (Microsoft)

Databases: SQL(Basic) - (HackerRank)
